Aphallia associated with urethro-rectal fistula and stones in the bladder and urethra.

Shamsa, A., Kajbafzadeh, A.M., Javad Parizadeh, S.M., Zare, M.A., Abolbashari, M. Ghaem Hospital, **Mashhad University of Medical Sciences, Mashhad, Iran.**

Abstract

Aphallia is a rare urogenital anomaly. It usually coexists with other serious anomalies, which are incompatible with normal life. We present herewith a 18-month-old child who presented with aphallia and urethro-scrotal fistula along with stones in the bladder and urethra. The stones were removed and the fistula was surgically corrected.
